EBSCO Publishing Doing Its Part to be GREEN

Environmentally-Conscious Business Practices of a Growing Company

EBSCO Publishing has forged a strong directive to maximize the company's level of environmental responsibility. The company has made a number of key infrastructure and policy changes to this effect and also encourages individual (employee) responsibility through ongoing company-sponsored events and guest speaker programs.

Present Initiatives:

-  **Solar Energy:** Installation of two 192-panel, 36 kW photo-voltaic solar panel systems on the roofs of the company's two largest buildings, which are expected to offset 20% to 25% of each building's energy needs. Also installed a solar-based hot water system for the company café.
-  **EBSCOhost Data Center:** Use of energy efficient servers in a building that employs smart building technologies, which is expected to reduce energy usage by 20%.
-  **Converting fleet of company-owned cars (US & Canada) to hybrid vehicles**
-  **Individual recycling bins provided to all employees**
-  **GreenFILE® Database:** Created a free database of pertinent information to help people learn more about the impact humans have on the environment—GreenFILE is available to the public on the Web at www.greeninfoonline.com
-  **Recycling all cardboard, mixed paper (magazines, newspapers, etc.), plastic bottles, and cans**
-  **Lunchtime talks/seminars featuring guest speakers from Mass Audubon, Essex County Greenbelt Association (local conservation land trust), and Paul Tukey (HGTV host) from SafeLawn.org**
-  **Light bulbs** have been changed from incandescent to high-efficiency fluorescents, and most areas have been equipped with either timers or motion/sound sensors that shut off the lights when not occupied. In addition, the company has installed LED lighting in its main lobby and may expand the use of LED lighting throughout its buildings.
-  **The Green Grid:** As a large database provider with two data centers on the Ipswich campus, EBSCO Publishing joined The Green Grid, a global consortium designed to advance energy efficiency in data centers and business computing systems
-  **Recycled paper** used in most of our printers and copiers
-  **Encouraging use of public transportation** by employees through cost reimbursement program
-  **Installing "Vending Misers"** on vending machines and coolers around campus to control the flow of electricity and help to reduce energy consumption by up to 50%
-  **All paper products** used in bathrooms and kitchenettes made of 100% recycled paper
-  **Employee Awareness:** Copies of "An Inconvenient Truth" given to employees, tree saplings provided to employees for planting, and EBSCO water bottles and travel mugs given to employees to cut down on paper and Styrofoam waste

EBSCO Publishing Doing Its Part to be GREEN

Environmentally-Conscious Business Practices of a Growing Company

While some "green" initiatives have the dual benefit of reducing costs along with energy consumption/waste (e.g., fluorescent light bulbs, more efficient HVAC systems), other more expensive initiatives have long-term environmental benefits that simply can not be measured in monetary terms. In the spirit of environmental stewardship, EBSCO Publishing believes in pursuing both types of initiatives, as we consider these initiatives to be investments in the future of our company and our planet.

We have experienced great success with the green initiatives that we have undertaken over the past few years, and EBSCO Publishing's goal is to continue to grow as a company while simultaneously making a positive impact on the environment. In today's business climate, many feel that successful growth and environmental stewardship are often mutually exclusive concepts. However, here at EBSCO Publishing we believe the opposite to be true. In order to truly achieve long term success, a company must proactively take care of the land and resources that have helped to sustain the organization through its many years of development.

Visit us at <http://www.ebscohost.com> and click on "Go Green!" to learn more.

Accolades and Accomplishments

- Winner – 2008 Environmental Merit Award from the U.S. Environmental Protection Agency
- Chosen as the *Knowledge to Go Green Champion* Exhibitor at the 2009 Special Library Association Conference for demonstrating the importance of weaving green practices through all corporate strategies
- EBSCO Publishing's solar panel initiative profiled on WCVB, Channel 5 news – Boston's ABC affiliate station
- Feature story on EBSCO Publishing's green contributions in leading monthly newsletter, *Business and the Environment*
- Finalist for an American Business Award for "Best Corporate Environmental Responsibility Program"
- Contributed article, "The Greening of a Business", to the UK magazine *FUMSI*, encouraging other businesses to Go Green

About EBSCO

Corporate Social Responsibility

EBSCO is a company with a conscience. From green initiatives to partnerships with local charities, we have positively impacted customers, employees and the community at large.

Our Initiatives

Workplace

We contribute positive changes at the office including hosting multiple blood drives, recycling, collections for local nonprofits and corporate races to raise awareness.

Community

We work with and donate to more than 25 local charities, schools and organizations, sponsor local hospitals, volunteer time and provide free educational resources.

Environment

We support sustainability with electric car charging stations, hybrid company cars, 100% recycled paper products, solar energy and a Certified Green cafeteria.

EBSCO Solar

EBSCO Solar

FAQs

Past Winners

EBSCO Solar 2019 Call for Submissions Closed

Check back for updates on the grantees in June 2019.

EBSCO Solar

EBSCO Solar is a grant program that funds solar installations at libraries.

Applications will be accepted until April 30, 2019, with the winners announced online and at ALA-Annual on June 21st.

Please visit <https://ebsco.fluidreview.com/> to apply. Contact ebscosolar@ebsco.com for questions.

Why EBSCO Solar?

Solar power is the cleanest and most abundant renewable energy source available. EBSCO now has more than 500 solar panels offsetting the amount of "brown power" we buy and generating clean energy to reduce EBSCO's environmental footprint. We believe we can help make a critical impact on improving the environment and we want to help a library make the same transition to green power.

Make EBSCO Your Source for ENVIRONMENTAL INFORMATION

EBSCO is the go-to source for information on Environmental Studies worldwide, with databases covering all areas of interest.

Environment Complete™

- Extensive full-text coverage of environmental studies:
- More than 3.6 million records
 - More than 1,300 full-text journals and monographs
 - Coverage dates back 100 years
- Subjects covered:
- Agriculture
 - Ecosystem ecology
 - Energy
 - Environmental law
 - Environmental technology
 - Geography
 - Marine and freshwater science
 - Natural resources
 - Pollution and waste management
 - Public policy
 - Renewable energy sources
 - Social impacts
 - Urban planning

Energy & Power Source™

- Unmatched collection of indexed and full-text energy and power industry-related content:
- Full-text coverage of more than 410 journals
 - Cover-to-cover indexing for more than 930 publications
 - Hundreds of full-text energy focused industry and market research reports
- Subjects covered:
- Coal
 - Electric power
 - Natural gas
 - Nuclear power
 - Petroleum
 - Renewable energy (including hydroelectric power, wind power, solar power and alternative fuels)

GreenFILE™

- Multidisciplinary coverage of the environmental effects of humans, corporations and governments:
- More than 800,000 records
 - More than 12,000 open access full-text records
- Subjects covered:
- Global climate change
 - Green building
 - Pollution
 - Sustainable agriculture
 - Renewable energy
 - Recycling

Environmental E-books from EBSCO

In addition to databases, EBSCO provides an extensive offering of e-books related to all areas of environmental studies, including:

- Climate change
- Energy development
- Environmental ethics
- Environmental management
- Forest ecology
- Green engineering
- Human ecology
- Renewable energy
- Waste management
- And more

EBSCO offers a number of e-book Subject Sets related to environmental studies. Subject Sets are pre-packaged collections of frontlist titles created by EBSCO's experienced Collection Development team.

Subject Sets related to environmental studies include:

- Biology and Life Sciences
- Civil Engineering
- Earth Sciences
- Energy and Green Technologies
- Environment
- Geographic Information Systems

EBSCO

EBSCO's **GreenFILE** offers well-researched information covering all aspects of human impact to the environment. This collection of scholarly, government, and general-interest titles includes content on global warming, green building, pollution, sustainable agriculture, renewable energy, recycling, and more. **GreenFILE** provides indexing and abstracts for more than 612,000 records, as well as full-text coverage for more than 9,100 records.

Access **GreenFILE** at www.greeninfoonline.com
